www.iamdan.me

I design, develop, deploy and maintain scalable web applications and services. I am particularly interested in engineering scalable cloud architecture, optimising developer workflows and building innovative user experiences.

Recent Experience

Phosphor Essence
September 2018 - October 2018
Created the front-end for moviexchange.com and integrated the site with Umbraco.

Dow Goodfolk
February 2018 - June 2018
Built the front-end for the new PrimePanels website. Created new user flows in the MyBallance app.

QuickSense
November 2017 - February 2018
Used React and VictoryChart to build the class overview dashboard of the Quicksense application.

Meaningful Technology
January 2017 - April 2017
Part of a team responsible for developing the new Bachcare website using React.

YourDrive
August 2016 - September 2016
Led the front-end redevelopment of the YourDrive application.

Weirdly
January 2015 - January 2016
Built the Weirdly recruitment application using a PHP MVC framework.

Qualifications

Bachelor of Engineering
University of Auckland
September 2016

Certifications

Certified Solution Architect (Associate)
Amazon Web Services
May 2017

Interests

I have always held a keen interest in all engineering disciplines, and I developed a particular interest in software development over a decade ago. My inquisitive nature leads me to continuously explore new technologies, and spurs my joy of hiking, reading and travelling. I'm also an avid skier and motorcyclist.
